We need more trees on hillsides and coastlines to avoid erosion.

94% (51) 1 19 1

We need to care for the foundations of the natural world (e.g. microbes, worms, beetles) and the insects, algae, lichens and other life at the bottom of the food chain, in addition to the big animals.

100% (73) 2 1 2

We should recognise and value our indigenous ecosystems for their contribution to global biodiversity. We've lost so much already

93% (46) 3 44 3

Everyone can make a difference, even if it's something small like a backyard native bird feeder or a small donation to a conservation group.
